

VARSHINI DEEKONDA

deekondavarshini10@gmail.com | [LINKEDIN](#) | +91 6303924569

Highly driven Data Engineer with 4+ years of experience in building scalable data pipelines and ETL workflows for enterprise level systems

SKILLS

Programming & Querying: SQL, pyspark, Python

Cloud & Databases: GCP (Cloud Storage, Dataproc, BigQuery, Cloud Composer)

ETL & Data Integration: Talend Big Data, Talend Administration Center(TAC), Talend Management Console(TMC), Qlik Replicate, Qlik Cloud Data Integration, Data Pipelines, Data Migration(ETL), Data Quality

RELEVANT EXPERIENCE

Diagonal Consulting LLP

Nov2022 - Present

PFC (Power Finance Corporation)–Data Engineer

- Architected and delivered scalable ELT pipelines ingesting high-volume financial data into GCS and BigQuery supporting operational dashboards and analytical workloads across the enterprise.
- Implemented Medallion architecture by ingesting raw data into the Bronze layer, applying transformations and SCD Type 2 logic in the Silver layer and building curated data marts in the Gold layer
- Engineered a metadata-driven ingestion framework supporting full and incremental load strategies with dynamic schema handling enabling schema evolution, reusable transformation logic and reliable processing of large-scale datasets.
- Orchestrated end-to-end pipeline execution using Cloud Composer, automated alerting and data quality validation significantly reducing manual intervention.

Muthoot Finance – Data Engineer

- Led end-to-end migration of 5,000+ tables (4 TB of data) from Oracle and SQL Server to Google BigQuery using Talend ETL delivered on schedule with zero data loss.
- Designed downstream transformation layer in BigQuery SQL, applying complex business logic, data modeling and partitioning/clustering strategies to improve analytical query performance.
- Optimized GCP costs through intelligent scheduling, replication monitoring and proactive task management to ensure a stable and cost-efficient data flow.

PSA Mumbai – Talend Support Engineer

- Provided L2/L3 production support for cross-platform data replication pipelines using Talend ETL, maintaining SLA compliance and high availability across enterprise environments.
- Configured and stabilized replication between IBM DB2 LUW sources and ODBC-based targets, resolving driver, endpoint and schema drift issues to ensure uninterrupted data flow.
- Root-caused and remediated replication failures and performance bottlenecks, reducing mean time to resolution and building a post-incident runbook library for the team.
- Collaborated with infrastructure and application teams to improve pipeline reliability, maintained documentation for replication architecture and incident root causes.

Cognizant Technology Solutions

Feb2022 - Nov2022

Programmer Analyst

- Developed and optimized SQL queries, designed relational database structures and applied data manipulation techniques across MSSQL environment.
- Contributed to data warehousing and reporting initiatives by delivering structured, analysis-ready data to support business intelligence efforts. Shared project insights and updates with supervisors and cross-functional teams, highlighting strong communication and collaboration skills.

EDUCATION

Maturi Venkata Subba Rao College of Engineering

Apr 2019 – May 2022

Bachelor of Engineering in Electronics and Communication-GPA:8.38/10

CERTIFICATIONS

- Qlik Data Integration Sales specialist
- Qlik Data Integration Solution specialist
- Qlik Data Integration Implementation specialist
